Plant Variety Protection Office Official Journal

Volume 25, Index

December 1997

1998 DEC -9 A 2 44

PREFACE

The Plant Variety Protection Act (7 U.S.C.2321 et seq.) authorizes the Secretary of Agriculture to publish an Official Journal to provide the public with information relating to the operations of the Plant Variety Protection Office. The statute also authorizes the Secretary to disseminate technological and other information that encourages innovation and progress in plant breeding.

The Official Journal is published quarterly and is available at no charge from:

General Information.....	221

INDEX TO APPLICATIONS PENDING FINAL ACTION AS OF DECEMBER 31, 1997

Applications for protection have been filed for the following varieties. Each application has been assigned an application number and is being examined to determine whether the variety is entitled to a certificate of protection. Seed of these varieties may be labeled "Unauthorized Propagation Prohibited - U.S. Variety Protection Applied For."

INDEX TO CERTIFICATES EXPIRED IN 1997

The term of protection has expired for the certificates listed below. The U.S. Plant Variety Protection Act no longer prohibits the unauthorized propagation of these varieties nor requires them to be sold by variety name, only as a class of certified seed. However, varieties published in this list may possibly be protected under the Patent Act.

DESCRIPTION OF PUBLIC VARIETIES

In accordance with section 97.800 of the Plant Variety Protection Act, descriptions of "public varieties" voluntarily submitted on the PVP objective description forms will be accepted for publication in the PVP Official Journal. Publication of such descriptions in no way constitutes recognition of the variety as distinct or entitles it to protection under the Plant Variety Protection Act.

The following is a description of a public variety of tobacco developed by Dr. E. A. Wernsman at North Carolina State University. Request for seed samples and further information about this variety should be directed to Mr. Michael W. Baker, Manager, N.C. Foundation Seed Producers, Inc., 8220 Riley Hill Rd., Zebulon, N.C., 27597.

VOLUNTARY TOBACCO DESCRIPTION

Variety Name: 'NC 72'

'NC 72' is a cytoplasmic male-sterile F₁ flue-cured tobacco hybrid produced by crossing breeding lines <NC 2560> X <NC 92-2770-40>. Parental line <NC 2560> was developed from a population formed by crossing breeding lines <NCTG 55> with <924025>. <NCTG 55> was later released as cultivar 'NC 55'. <NC 92-2770-40> is a doubled haploid line developed from an F₁ hybrid of breeding line <NCTG 60> ('K 326' X 'Coker 371-Gold') crossed to 'K 326'. The female parent <NC 2560> was converted to male sterility by backcrossing the line into a *Nicotiana suaveolens* cytoplasmic source. Flowers are actually stamenless, and contain one rudimentary pistil in place of the five stamens. 'NC 72' possesses a single gene conferring parthenocarpic development of fruit when flowers are not pollinated. Such fruit contains no viable seed, however. 'NC 72' was tested as <NCTG 72> and <NCTG 87>.

Class		Internode length
Flue-cured		5.5 cm
Maturity class		Leaf carriage
Very late		Arched
Maturity	67	Leaf color
days		Medium green
Height class		Leaf shape
Medium		Broadest
Plant height topped		below middle
104 cm		Leaf tip shape
Plant height not topped		Acuminate
146 cm		Leaf venation
5th leaf length		Angular
58.5 cm		Leaf surface
5th leaf width		Puckered
35.0 cm		Leaf margin
5th leaf angle	45°	Not wavy
10th leaf length		Leaf margin curving
63.0 cm		Not recurved
10th leaf width		Flower color
30.1 cm		Pink
10th leaf angle	57°	Flower habit
15th leaf length		Intermediate
58.0 cm		Plant form
15th leaf width		Columnar
25.3 cm		Ground suckers/plant
15th leaf angle	42°	0.2
Leaf yield		% Nicotine
3755 kg/ha		2.78
Leaf number topped	20	% Nor nicotine
Leaf number not topped	23	0.14
		% Total nitrogen
		2.27
		% Reducing sugars
		17.2

Plant Diseases: 'NC 72' possesses moderate resistance to bacterial wilt caused by *Pseudomonas solanacearum* and is resistant to races 1 and 3 of the root-knot nematode, *Meloidogyne incognita*. It is susceptible to races 2 and 4 of the nematode. 'NC 72' possesses a very high level of resistance to tobacco black shank caused by *Phytophthora parasitica* var. *nicotianae*. The very high black shank resistance results from a single qualitative gene that confers complete resistance to the common race of this organism, race 0, pyramided upon an oligo genic resistance originally derived from the cigar cultivar 'FLA 301'. The resistance mechanism from 'FLA 301' is equally effective against both races of this fungus. The qualitative gene is of no value in controlling race 1 of *P. parasitica* var. *nicotianae*, however. 'NC 72' is susceptible to all of the major viral diseases of flue-cured tobacco. These include tobacco mosaic virus, tobacco etch virus, potato virus Y and tomato spotted wilt virus.

GENERAL INFORMATION ON PLANT VARIETY PROTECTION

The Plant Variety Protection Act provides patent-like protection (plant breeders' rights) for sexually (i.e., seed) and tuber reproduced plants. The variety must be distinct from all other varieties, uniform, and stable. If the variety has been sold or used in the United States for more than one year or in a foreign country for longer than four years, then the variety is ineligible for protection. Use of the variety includes selling or disposing of reproductive or harvested material of the variety or use as a parent in a first generation hybrid.

Please submit your complete application (completed and signed application form, Exhibits A,B,C, & E, seeds, and fees) to our office before the period of eligibility expires. You may choose a representative to complete and receive all paperwork on your behalf. Current costs are given in the Regulations and Rules of Practice (Section 97.175) and on the application form.

To obtain copies of application forms, the Plant Variety Protection Act and its Regulations and Rules of Practice, please send a request including the crop type to: Plant Variety Protection Office, 10301 Baltimore Blvd., Room 500, Beltsville, Maryland 20705-2351.

Internet users now have access to the U.S. Department of Agriculture on the Plant Variety Protection Act. The homepage provides up-to-date information on applications received by the Plant Variety Protection Office.
